Furniture polish, Shoe polish	Seek the help of a professional upholstery cleaner
<p><b>Notes on Cleaning Agents</b>            The following procedures should be used with all cleaning agents. A clean, white cloth dampened with the recommended cleaning agent should be used in an inconspicuous place to test for color-fastness. Optimum cleaning will be achieved by not over-wetting the cloth and by turning it frequently to keep it clean. Rings can be avoided by working from the outer edge of the spot toward the center. This process should be repeated until the spot is removed or there is no further transfer to the cloth.</p> <p><sup>1</sup>Detergent.....One teaspoon neutral powder detergent (e.g. Tide or All) in 1 pint warm water.</p> <p><sup>2</sup>Ammonia.....A 3% solution.</p> <p><sup>3</sup>Vinegar.....White vinegar or a 10% acetic acid solution</p> <p><sup>4</sup>Solvent.....Dry cleaning fluid - preferably 1.1.1 trichlorethane</p> <p><sup>5</sup>Paint remover.....Paint remover with no oil in it.</p> <p>NOTE: Oily and greasy stains --- In addition to the recommended method, some stains (e.g. perspiration/body oils) respond well to dry cleaners such as "HOST" (Racine Industries), "CAPTURE" (Milliken) and "K2R" (Texize). Carefully follow directions on the label.</p>	

\* Recommendations based on fabrics finished with Du Pont Teflon® WBC Soil and Stain Repellent for CORDURA®. The methods were effective on stains that were allowed to sit untreated overnight. Removal is usually easier when stains are cleaned immediately.
